

60-SECOND POSTER PREVIEW

Using BindCraft to target Rgg3 quorum sensing

The Pocket Wants What the Filter Rejects

THE PROBLEM

Rgg3 links quorum sensing to virulence, making it a promising anti-virulence target.

THE DESIGN CONFLICT

2,500+ BindCraft trajectories.
0 passed the default final filters.
Hydrophobicity was the main barrier.

**How can we redesign the pipeline—or
verify what its filters reject?**

Rgg3 electrostatic surface · designed peptide in cyan

ONE OF SIX ADVANCED FOR EXPERIMENTAL TESTING

Come see how we're resolving the Rgg3–filter conflict.
